

INVENTORY MANAGEMENT SOLUTIONS

Optimal supply programs and stock management strategies designed to streamline your production processes.

WE MANAGE YOUR INVENTORY AND STREAMLINE YOUR PRODUCTION PROCESSES, **SAVING TIME & MONEY**

Valley Fasteners inventory management system is a stock management strategy designed to streamline your production processes by ensuring the correct fasteners and industrial consumables are available to your production and maintenance departments. We work hand in hand with your team to create an optimal supply program ensuring the right amount of inventory is always available.

As inventory management specialists, Valley Fasteners can use purchase history data to create usage reports and design a system to help monitor, manage, and assess the products you use every day, on a replenishment cycle that suits you.

**THE RIGHT
PART IN THE
RIGHT PLACE
EVERY TIME**

We ensure that every inch of racking space is custom designed with consumables specific to the needs of your workplace.

**CONSISTENT
PRICING FROM
A SINGLE
SUPPLIER**

No need to chase multiple vendors for the best price - we establish and lock in specific pricing so you can rest easy.

**ELIMINATE
DOWNTIME
REDUCING
TOTAL COSTS**

We work with your team to establish min/max stock levels based upon purchase history to ensure you never run out of stock.

**SAVE TIME
- NO MORE
INVENTORY
HASSLES**

Our dedicated team will check and replenish stock on a cycle that works for you, meaning no more trips for last minute supplies.

ASK US ABOUT OUR LONGSPAN RACKING SOLUTIONS

Longspan shelving is an easy to assemble versatile shelving system. If you prefer the look of a shiny new shelving system Longspan is your answer. With pre-built frames and clip in beams, anyone can assemble a bay in minutes. Contact us for pricing.

The Longspan Shelving system permits the manual picking storage of medium and small materials. This is a versatile racking that adapts to any type of unit load and facilitates direct and immediate access to stored SKUs. Generally, shelves are a good option if you need to store light and flat items that can be easily handled by human operators.

However, racking is the better choice when you deal with heavy, bulky or awkward items. They're also highly customizable, which makes them ideal for storing irregularly shaped and sized items.
